

A

- absolute brightness** **601**
 surface temperature of star and 604–605
- absolute zero** 26
- acceleration** **350–355, 351**
 analyzing 352–353
 calculating 352–353
 changes in force and mass and 391
 equation 391
 free fall and **386**
 graphing 354–355
 due to gravity **386**
 Newton's second law of motion and 390–391
- accidents, first aid in case of** 47
- accuracy** 31
- acetic acid** 276, 303
- acetylene** 301
- acids** **268**
 acid-base reactions 278–279
 common 275
 litmus test for 270, 275
 organic **303**
 properties of 268–270
 safe use of 277
 in solution 274–275, 276
 strength of 276–277
 uses of 272
- actinides** 134, 136, 144
- actinium** 144
- action force** 394–395, 403, 442
 rockets and 504
- action-reaction pairs** 394–395
- activation energy** 235, 236
 for combustion **243**
 controlling rate of reaction by changing 239
- addition of measurements** 32
- air**
 as fluid 428
 as mixture of gases **95**
 nonmetals in **149**
 as solution **65**
 weight of 418
- air bags** 232–233
- aircraft**
 flight of 220, 437, 439, 442–443
 helicopters 442–443
- airplane wing, Bernoulli's principle and** 439
- air pressure** 418–421
 balanced 419
 boiling point of water and **99**
 elevation and 420, 421
 measuring 422
 at sea level 419
- air resistance** **387**
- alanine** 319
- alcohol** **302–303**
- Aldrin, Buzz** 512, 513
- Algol** 615
- alkali metals** 140, 179
- alkaline earth metals** 141
- alloys** 142, 144, **199**
- Alpha Centauri A and B** 615
- alpha particle** 160, 161
- aluminum** 142
- Americium-241** 144, 145
- amino acid** 308, 319, 322
- amino group** 319
- ammonia** 275
- amorphous solids** 92
- Andromeda Galaxy** 621, 622
- aneroid barometer** 422
- ane suffix** 301
- animals, natural polymers made by** 308
- Antarctica, meteorites in** 576
- antifreeze** 261
- Apollo 11 (spacecraft)** 512
- Apollo program** 512–513, 514
- apparent brightness** **601**
- Archimedes** 428
- Archimedes' principle** 428–429
- architecture, metals in** 198
- area, pressure and** 417
- argon** 154
- Armstrong, Neil** 512, 513, 560
- artificial satellites** 402, 403, 511
 space station as 517
- ascorbic acid (vitamin C)** 272, 323
- astatine** 153
- asteroids** 519, 574, 575
- astronauts** 511, 515, 520, 544
 microgravity (weightlessness) of 521
 moon missions 512–513
 working in space 516–517
- astronomers** 590, 598
 early Greek 539–540
- astronomical unit** 543
- astronomy** 464.

Focus on

California Physical Science

Unit 1 Chemical Building Blocks

Chapter 1 *Introduction to Physical Science*

- 2 *The Nature of Matter*
- 3 *Solids, Liquids, and Gases*
- 4 *Elements and the Periodic Table*

Unit 2 Chemical Interactions

Chapter 5 *Atoms and Bonding*

- 6 *Chemical Reactions*
- 7 *Acids, Bases, and Solutions*
- 8 *Carbon Chemistry*

Unit 3 Motion, Forces, and Energy

Chapter 9 *Motion and Energy*

- 10 *Forces*
- 11 *Forces in Fluids*

Unit 4 Astronomy

Chapter 12 *Earth, Moon, and Sun*

- 13 *Exploring Space*
- 14 *The Solar System*
- 15 *Stars, Galaxies, and the Universe*
